

Your \$10K/Month Quickstart Guide

A simple, step-by-step roadmap to start building real income online — even if you're starting from zero.

1

Pick One Income Path

Don't try to do everything at once. Choose ONE proven path — affiliate marketing, e-commerce, or a digital course — and commit to it for at least 30 days before judging results.

2

Set Up Your Free Tools

Create your free accounts: an email autoresponder, a link page, and basic analytics. These free tools are enough to launch your first campaign today — no big budget needed.

3

Promote One Offer Daily

Consistency beats perfection. Share one product or offer every day on social media, in communities, or via email. Small daily actions compound into real momentum.

4

Build Your Email List

Your email list is your most valuable asset. Offer a free guide (like this one!) in exchange for a name and email, then nurture that list with helpful tips and offers.

5

Track, Tweak, and Scale

Review what's working weekly. Double down on what converts, cut what doesn't, and reinvest your first earnings into tools or ads that accelerate growth.

6

Stay Consistent for 30 Days

Most people quit right before momentum builds. Commit to 30 days of consistent action and you'll have real data, real skills, and very likely your first sales.

A Quick Reminder

This guide is a starting point, not a guarantee. Results from any online business depend on effort, consistency, and market conditions — individual results will vary. Use this guide alongside the training and tools inside IncomeEdge™ Academy for the best chance of success.
